High-tech woven flooring

Your responsible choice in flooring. High-tech, high design.

Collection & product Alhambra Emerald Installation pattern Ashlar

Collection & product Strata Coal planks Installation pattern Random staggered A/B

09 — Aesthetics & technology united

Find out how our refined high-tech woven flooring fits your everyday needs in performance and acoustics, while presenting a great look and feel.

Sustainably produced — 23

Learn how we care for our planet by investing in more sustainable and durable products, eco-conscious production processes and a circular future.

33 — Sector solutions

Our vast library of products allows you to design any kind of environment: from a productive workspace, to a hospitable hotel lobby.

Timeless collections — 65

Discover our collections: a wide range of designs and patterns, available in an abundance of colours.

119 — 2TEC2 Rugs

Beautiful textures to create inviting spaces.

Installation, maintenance & technical info — 125

Learn all about the high-tech performance of our refined woven flooring and how to install and maintain your 2TEC2 floor as beautiful as it was intended to be.

130 — Samples & tools

Don't hesitate to order your samples, contact us or visualise your upcoming project with our images, BIM files or digital simulator.

What drives us to create

"We create more than just floors, we provide solutions"

Collection & product Strata Silica - Installation pattern
Ashlar A/B Contractor Les Batisseurs

— Katia Dewitte
Managing Director 2TEC2

"2TEC2 is a brand that continuously strives for **innovation** in terms of technology and **sustainability**. The 'TEC' in our name refers to our ambition to make a difference in the flooring world with a high-tech product for architects, for people and for the planet.

We invest heavily in the development of new materials, improved product design and a fully circular process. Sustainable entrepreneurship is our duty as a company in the years to come. We strongly believe that **design** can go hand in hand with **respect for the environment**. Aesthetics are at the heart of 2TEC2, it's our DNA. Our flooring is completely designed and produced in Belgium, guaranteeing total control and premium quality. Our personal and family-oriented nature, our passion for textures and our appreciation for craftsmanship form the basis of our business philosophy."

Refined aesthetics

UNIQUE DESIGNS

Natural elements are the inspiration for our biophilic designs. Nature is always in balance, its appealing aesthetics never fade. This is what we strive for: to achieve natural beauty and balance indoors.

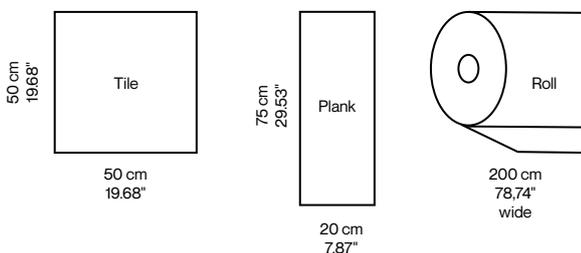

- We keep up with the newest trends in interior design.
- We provide timeless flooring that never goes out of style.
- We create our own colours and thus provide a wide range of original shades.

ENDLESS DESIGN CREATIVITY

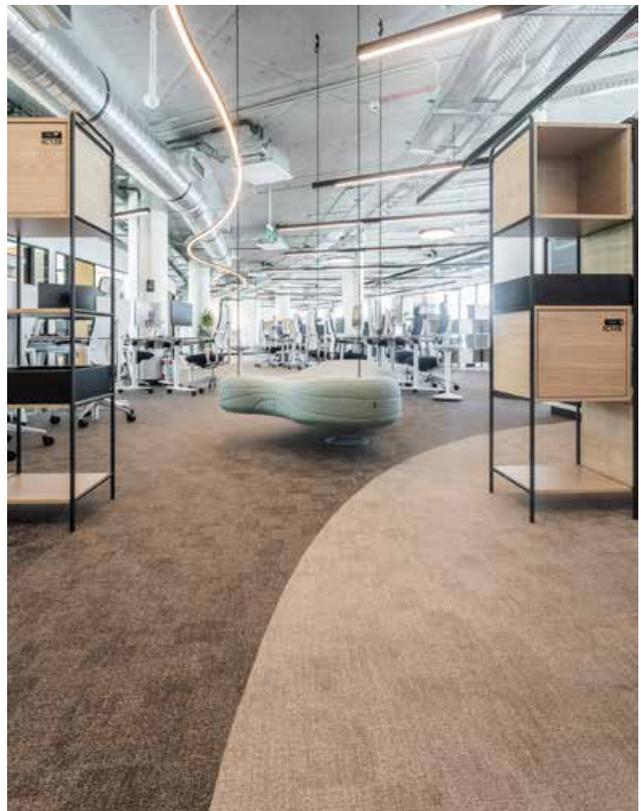

Our flooring is standard available in tiles, planks or rolls. You can also discover the fun and unique shapes of our Play concept on p.116. For important projects, you can create your own design and colour.

Our standard sizes:

ZONING

Flooring is the perfect way to visually and functionally define different zones in bigger spaces. By using different colours from our wide range of shades, you can easily create several areas serving different purposes.

Our in-house design team creates unique biophilic designs, inspired by nature.

Marble & Desert collection

STRUCTURE & TEXTURE

The woven top layer has a textured look and feel. The 3D-jacquard weave with round vinyl yarns is truly unique and exudes luxury.

SEAMLESS

Nearly all our designs are seamless in an ashlar or brick installation pattern. This means you are not able to see the seams between the tiles. This creates a broadloom effect.

COLOUR CHANGE

With 2TEC2 flooring, you can create a unique design effect. The woven structure offers a change of colour, depending on the installation and point of view.

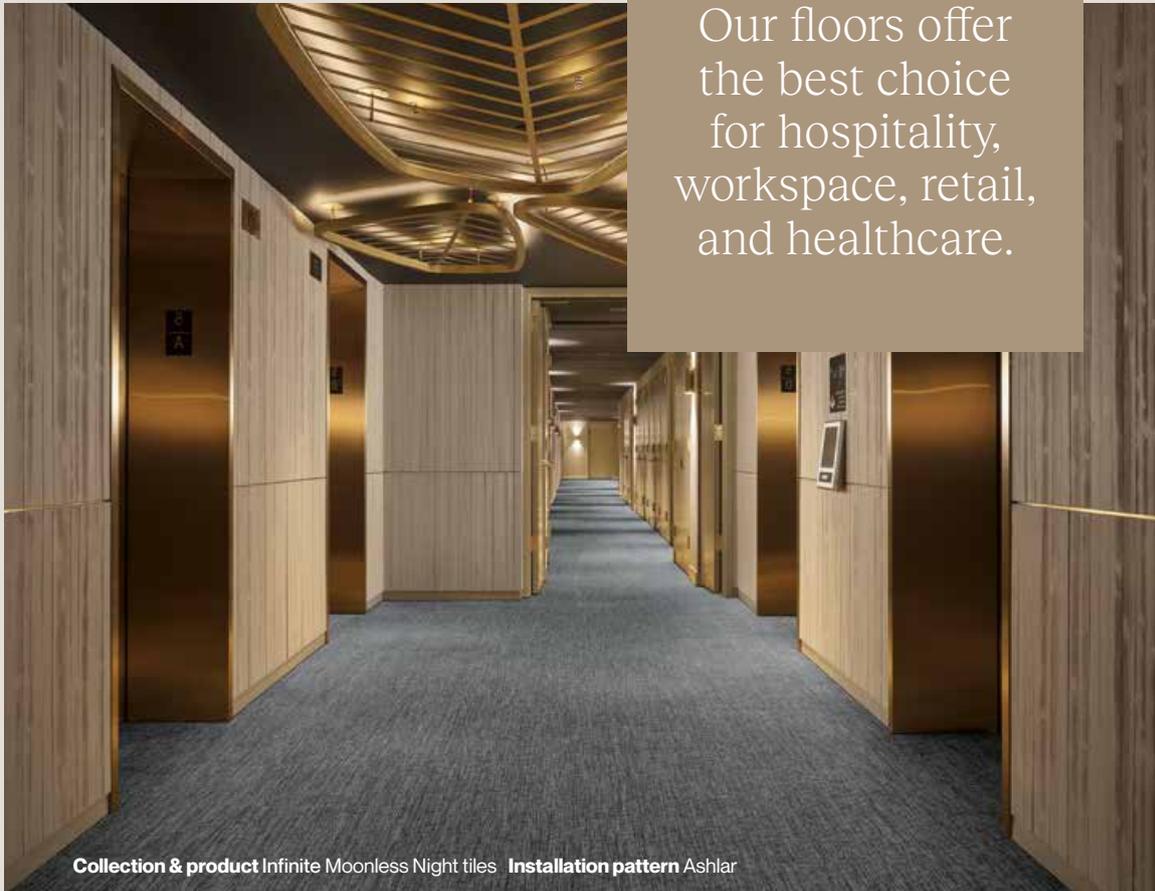

DIRT CONCEALING

Our designs can visually conceal dirt or stains, because we play with design, colour, and texture. Your floor can be thoroughly cleaned with every cleaning round.

High tech, high performance

Our floors offer
the best choice
for hospitality,
workspace, retail,
and healthcare.

Collection & product Infinite Moonless Night tiles Installation pattern Ashlar

BEST OF BOTH WORLDS

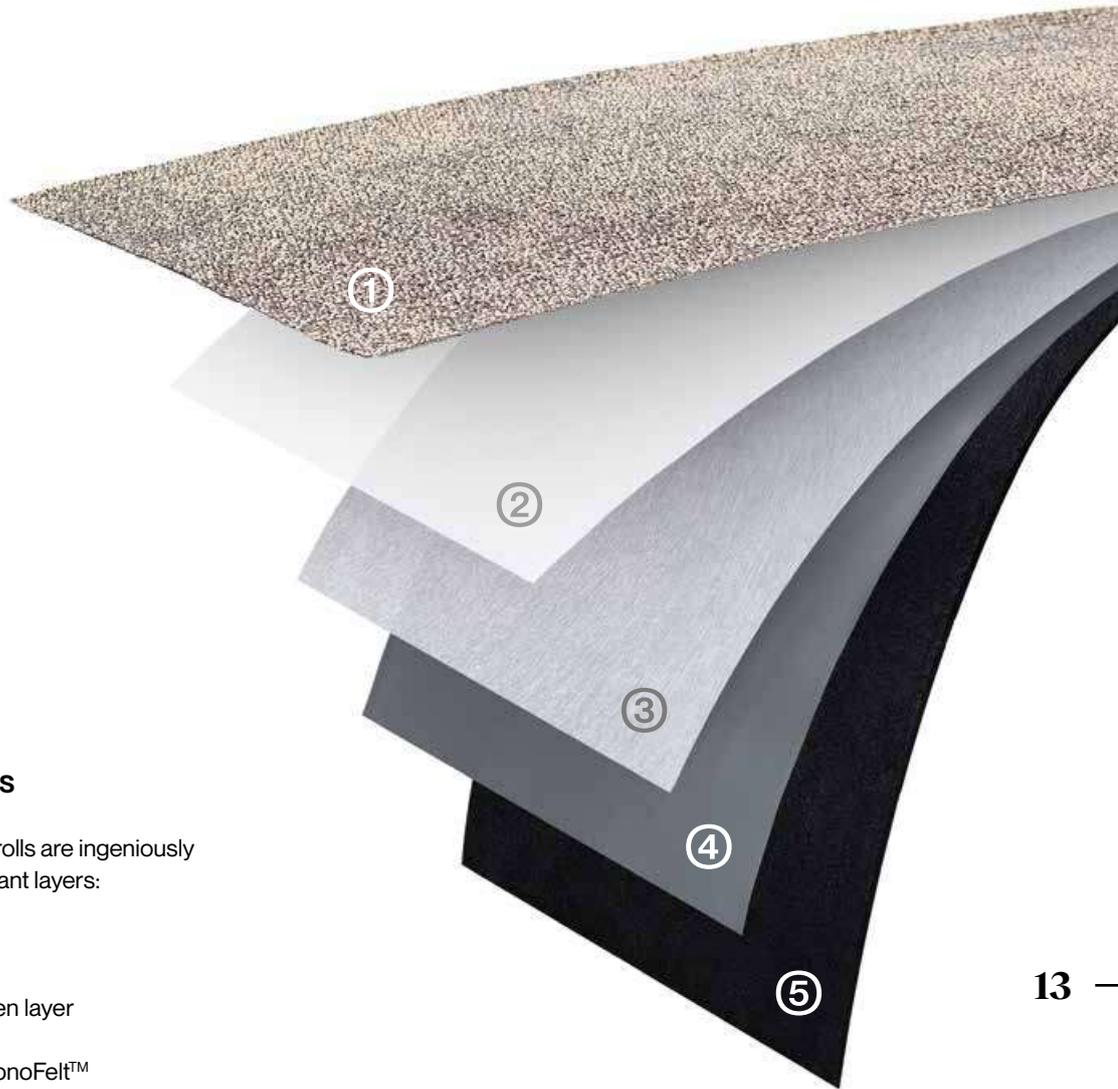

We offer the durability and cleanability of hard flooring combined with the acoustic properties and comfort of soft flooring.

CLASS 33 HEAVY COMMERCIAL USE*

2TEC2 floors are ideal for the project market: they are suited for high traffic levels, castor chair tested, and shockproof. Thanks to their long life span, we are confident to offer a warranty of 15 years.

(* According to EN1307.

STRENGTH IN LAYERS

Our high-tech tiles and rolls are ingeniously composed of 5 performant layers:

- ① Woven layer
- ② Precoat layer
- ③ Fibreglass non-woven layer
- ④ Base coat layer
- ⑤ Acoustic felt layer SonoFelt™

COLOUR FASTNESS

Our floors retain their colours, even when exposed to heavy foot traffic and light. This is because our vinyl yarns are coloured to the core.

LIGHT REFLECTION VALUE (LRV)

LRV is a score that indicates how much a surface reflects light. Thanks to our wide range of values, you can brighten up a room or prevent overexposure. A document with all values is available for you at your request.

DIMENSIONAL STABILITY

Our strong build-up of layers and our tight weave with yarns with a fibreglass core guarantee a high dimensional stability. This results in minimal shrinkage or expansion when exposed to changes in temperature or humidity.

UNDERFOOT WALKING COMFORT

The underlayer of floorings has an important impact on walking comfort and how knees, feet, and back are affected by steps. 2TEC2's felt underlayer provides extra comfort.

QUALITY CONTROL

All our products are quality and performance tested in external certified labs to get the necessary certificates. We also invested heavily in our own laboratory in order to perform daily in-house testing and to deliver the best quality.

EASY INSTALLATION

2TEC2 floors allow a hassle-free installation, they require little preparation and tools.

NON-PERMANENT INSTALLATION

Our tiles are installed with a tackifier adhesive. This makes them stay in place, yet easy to remove and replace when necessary or even reuse in another space.

RAISED FLOORING SYSTEM

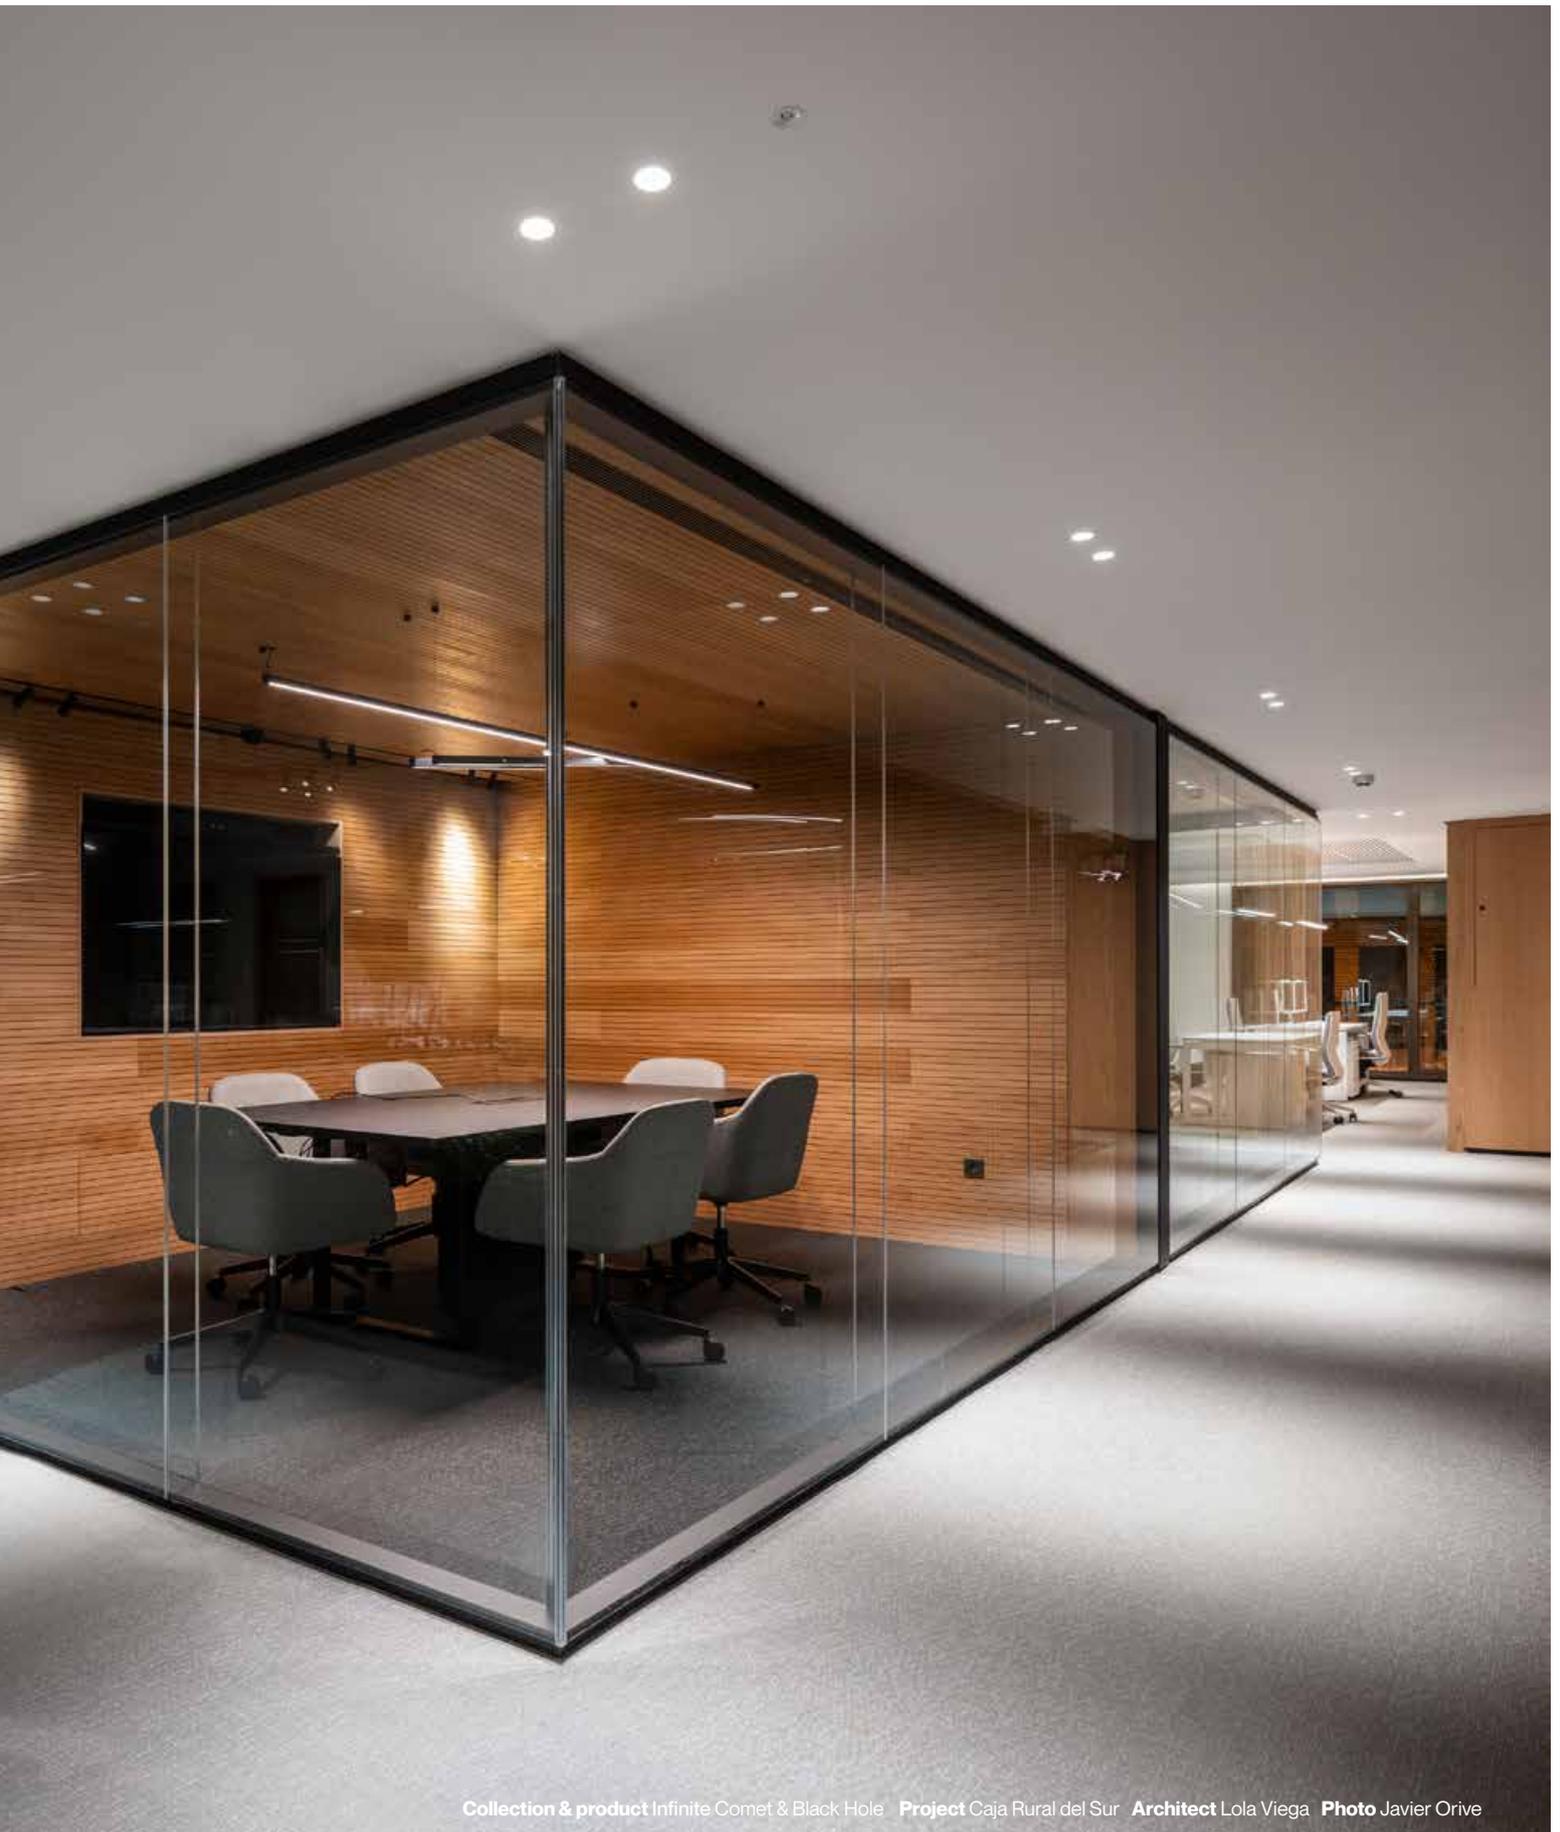

2TEC2 is the perfect choice for raised flooring systems, keeping easy access to technical installations beneath the floor.

FLOOR HEATING

Our floors are suitable for underfloor heating or cooling, allowing installations to perform as they should.

Excellent acoustics

Our acoustic comfort backing SonoFelt™ provides maximum acoustic wellbeing.

WHAT HAPPENS WHEN SOUND WAVES COLLIDE WITH A SURFACE

When a sound collides with a surface, it can go three ways:

- ① it can be **echoed** back
- ② it can be **absorbed** by the surface
- ③ it can **go through** the surface

Your choice of flooring has an impact on what happens and thus defines your level of **acoustic comfort**.

① WALKING NOISE REDUCTION

This concerns sound waves which are echoed back in the room.

'Walking noise reduction' is the difference in noise level when walking on 2TEC2 flooring compared to walking on laminate.

2TEC2's SonoFelt™ 19 dB backing reduces walking noise by 70%.

- ① Reflected noise
70% walking noise reduction

- ② Absorbed noise
0,15 α_w sound absorption

- ③ Reduced noise
19 dB impact sound reduction

② ACOUSTICAL SOUND ABSORPTION

This applies to the absorbed noise in a room.

'Acoustical sound absorption' is the level of absorption of sound waves in a room. When a sound wave hits a surface, a portion of that wave is reflected, a part is absorbed. The better the absorption of a sound wave, the less reverberation.

2TEC2 absorbs 15% (0,15 aw) of the sound waves that hit the floor.

Collection & product Hybrid Lyra

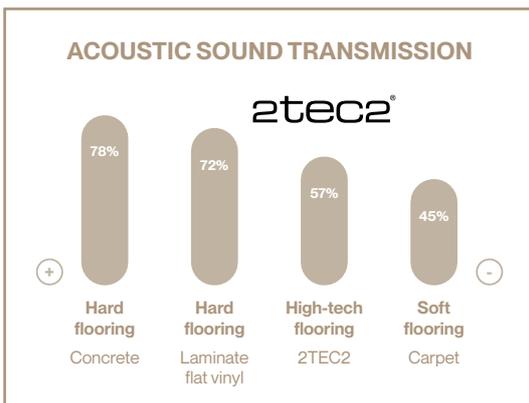

③ IMPACT SOUND REDUCTION

This metric refers to the level by which sound waves are transmitted through the floor into the room beneath.

'Impact sound reduction' is the difference in noise levels as measured in the room beneath the floor when walking on 2TEC2 flooring compared to walking on a concrete floor.

→ 2TEC2's SonoFelt™ 19 dB acoustic backing reduces the sound coming from the room above by 19 dB.

Cleanability

A highly maintenance-friendly floor solution

EASY MAINTENANCE

Our floors can be easily cleaned with just water, there is no need for hazardous chemical cleaning products. They are also stain-resistant. Since they do not absorb any liquids, stains are easy to remove.

DUST RESISTANT MESH

Our top layer traps dust and dirt, allowing for effective cleaning with a vacuum cleaner and water.

WATERPROOF

Our superior woven texture is waterproof, so it is very easy to rinse dirt away. Also, our floors are not affected by moist conditions. They offer ease of use for spas and gyms or healthcare environments.

Health & hygiene

ANTI-ALLERGENIC PROPERTIES

The structure of our flooring keeps dust particles from floating around, so they cannot affect your health. Most of all, unlike a regular carpet, they can be easily vacuumed and removed. We don't use materials that can cause an allergic reaction.

Collection & product Infinite Coffee Bean tiles

ANTI-FUNGAL PROPERTIES

Our floors obtained the best score in specialised tests. This certifies that 2TEC2 floors do not allow fungi to grow, which makes them an ideal solution for moist environments.

Collection & product Infinite Planet

SUITABLE FOR DISINFECTION

Our floors are resistant to disinfectants, a necessity in healthcare environments. The yarn's colour intensity is not affected, even after years of maintenance.

**NO HARMFUL VOLATILE ORGANIC
COMPOUND EMISSIONS (VOC'S)**

2TEC2 flooring ensures a safe and healthy environment without indoor air pollution. Our floors are Indoor Air Comfort Gold and FloorScore certified, meaning they release no harmful VOCs.

We avoid the use of harmful raw materials in the production of our floors.

feet with

2tec2[®]
high tech flooring

Collection & product Hybrid Magellan

REACTION TO FIRE

All our floors are fire-retardant. 2TEC2 features a **Bfl-s1 classification**, the most strict fire class for textile floor covering.

ANTI-SLIP PROPERTIES

Our floors have **anti-slip properties**, which minimises the risk of falling. This makes us an excellent option for healthcare environments and public spaces.

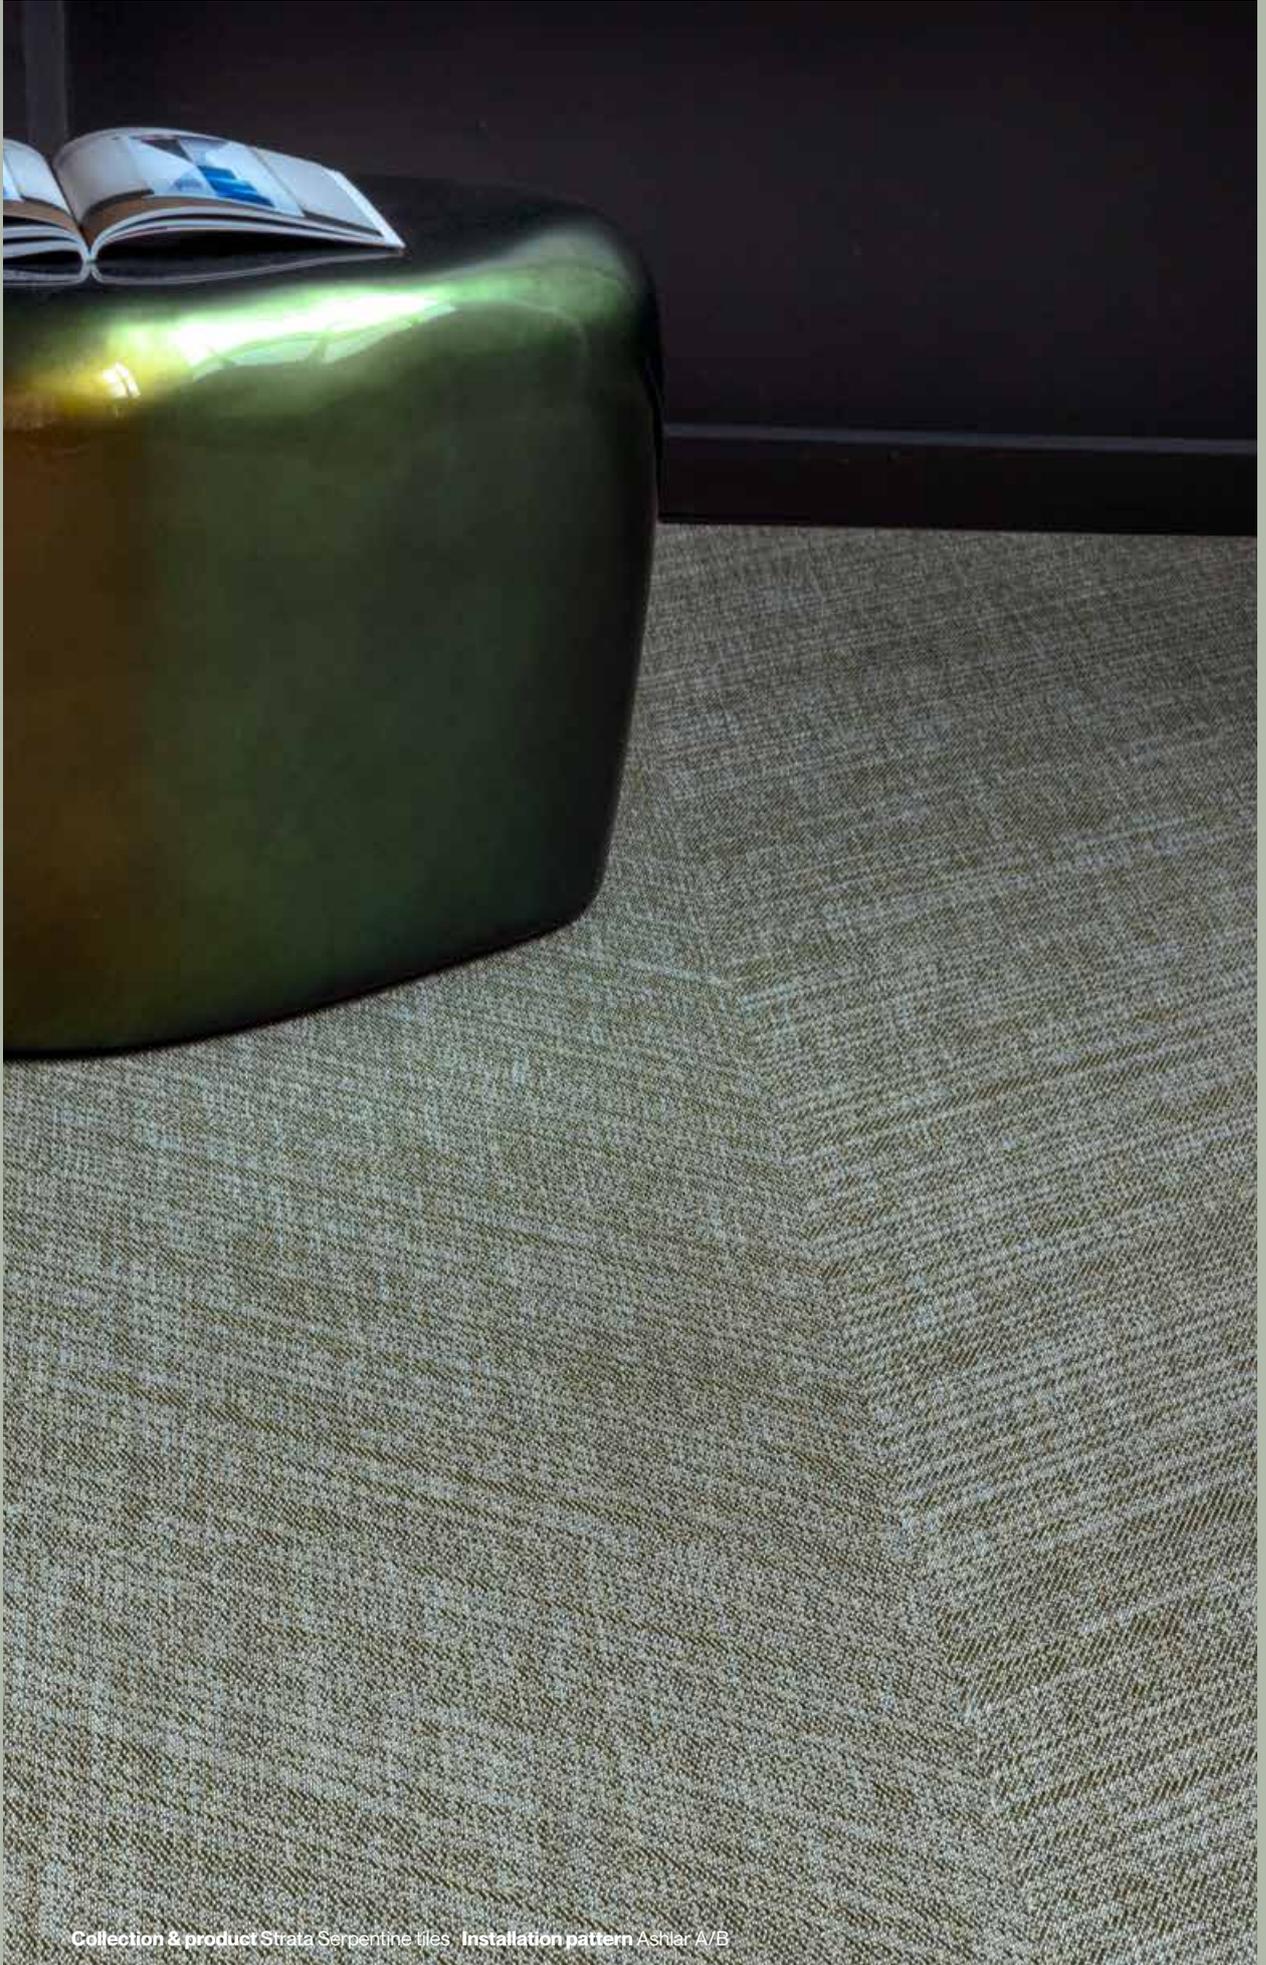

ANTI-STATIC PROPERTIES

Walking on plastic or carpeted floors creates friction that can make you electrically charged. Thanks to our anti-static additives, we prevent this from happening.

NO DANGEROUS SUBSTANCES

Our flooring contains **no dangerous substances** like **phthalates** and heavy metals. We are REACH compliant and M1 certified.

Collection & product Strata Serpentine tiles Installation pattern Ashlar A/B

Sustainably produced

23 —

2TEC2 is devoted to designing and producing **recyclable woven flooring**. We aim for the highest sustainability performance, while preserving and protecting the world beneath our feet.

The 3 C's of 2TEC2

OUR SUSTAINABILITY PILLARS AND OUR
VISION ARE CENTRED AROUND

3 C's
Care, Circularity and
Compliance.

Compliant with sustainability standards,
certificates and labels

CARE

Care for our planet & environment
Care for people & health

At 2TEC2, we produce responsibly by increasing our use of renewable resources and decreasing our CO₂ emissions through :

- A fully-controlled 100% vertically integrated production in one location, minimising transports.
- Energy optimisation with photovoltaic panels and a giant battery energy storage system (BESS), as well as a heat recovery system and a closed water cooling system to reuse energy and water.

Also, your health and comfort is top priority for 2TEC2. We make a difference through :

- A flooring solution with no harmful VOC emissions and absolutely free of phthalates or heavy metals
- Excellent hygiene and cleanability
- Excellent acoustics

CIRCULARITY

Circularity, recycled content and recyclability

Our goal is to reach 0% virgin fossil raw material and to be fully recyclable. We achieve this ambition through innovative action plans on :

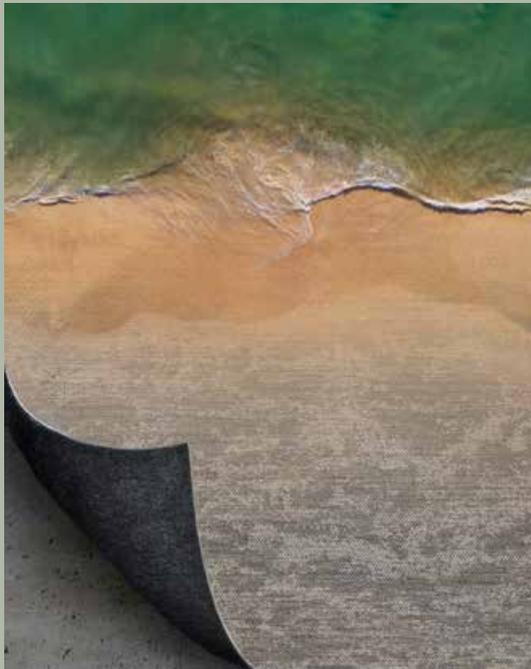

- Bio-based materials: the top weave of our newest collections is bio-based. This is a renewable resource.
- Recycled contents: our acoustic SonoFelt™ backing consists of 70% recycled PET.
- 100% recyclable product: 2TEC2 is designed and produced to be recycled and to regenerate new 2TEC2 flooring again and again.
- In-house recycling plant: pre-consumer waste is converted into new tiles.

COMPLIANCE

2TEC2 complies with a series of respected international certificates and labels that are proof of our commitments and actions for a more sustainable future.

Sustainable Development Goals

2TEC2 contributes to the following United Nations Sustainable Development Goals. These targets serve as focal points for our action plans.

The green revolution of bio-based materials

DECARBONISATION

As part of our pioneering journey, 2TEC2 created bio-based flooring collections made with a significant amount of renewable, biological materials. This switch from fossil to renewable resources in our production processes and product composition contributes to the decarbonisation of the economy.

BIO-BASED MATERIALS IN OUR FLOORS

Together with our supplier, we were able to create bio-based vinyl which is used in the top layer of our woven flooring. Thanks to this innovation, the top weave of our bio-based collections consists of 40% bio-based content.

- Sustainable & environmentally friendly: less reliance on fossil resources.
- Quality & style: the look and functionality of 2TEC2 remain unchanged.
- Contributing to a greener future: your choice makes a difference !

Bio-Based

What are bio-based materials?

Bio-based products are derived from materials of biological origin such as plants, excluding materials coming from geological formations and fossilised materials.

Virgin fossil raw materials are a finite resource, whereas bio-based ones are renewable. The use of bio-based products leads to a reduction of CO₂ emissions, toxic waste and energy and water consumption during production processes. In short, choosing bio-based materials is a step in the right direction towards a more sustainable future.

Our own recycling facility

Our goal is to reach 0% virgin fossil raw material and to be fully recyclable. More bio-based materials, more recycled contents & our own recycling plant are the key drivers to achieve this.

RECYCLED CONTENT

Choosing for 2TEC2 means saving the equivalent of 15000 PET bottles from landfill for every 1000m² flooring. Our current felt underlayer is composed of 70% recycled PET contents. We aim to increase this share even more.

RECYCLABILITY

All 2TEC2 tiles, rolls and planks are 100% recyclable. 2TEC2 is designed and produced to be fully recyclable and to regenerate new 2TEC2 flooring again and again, without losing any strength.

As pioneers in this field, we see an exciting challenge in contributing to the preservation of the planet's finite resources.

THE 2TEC2 RECYCLING FACILITY

A brand-new 2TEC2 recycling facility will convert pre-consumer production waste into raw material that will serve as a basis for new, strong and attractive 2TEC2 tiles.

Our journey towards a circular future

2005 LONG-LASTING DURABILITY

From the start, the product was designed to be durable and long-lasting.

2013 REDUCING AND REUSING PRE-CONSUMER WASTE

Leftover yarns are smartly used in the production of outdoor rugs of our sister company and other products.

2017 INTRODUCING RECYCLED CONTENT

The acoustic felt backing now contains recycled PET content.

2019 REDUCING OUR CARBON FOOTPRINT

2TEC2 invests in **solar installations** and a **heat recovery system**. We install a fully integrated production cycle to ensure a durable, long-lasting quality, and to drastically improve our ecological footprint and energy consumption.

2023
DESIGN FOR CIRCULARITY

Investments towards a greener future:

- R&D and operations adjustments
- New product design
- Building our new in-house recycling plant

2023
**REVOLUTIONARY INNOVATION:
ADDING BIO-BASED CONTENT TO OUR
FLOORS**

Pioneering in our type of product, we have launched our floorings with bio-based content in the top layer's woven structure. A major step in our journey to reducing fossil-based materials.

2023
INCREASING OUR RECYCLED CONTENT

We introduce SonoFelt™, our new felt underlaying backing, composed of 70% recycled PET and reducing noise by 19dB or more.

2024 - 2025
A FULLY CIRCULAR FUTURE

We will fully reuse and recycle our floors, production waste and leftover materials into new 2TEC2 tiles or rolls.

**HOW DO WE PLAN TO REACH OUR GOAL
OF BEING FULLY RECYCLABLE WITH 0%
VIRGIN FOSSIL RAW MATERIAL?**

- ✓ Using bio-based materials
- ✓ Using more recycled contents
- ✓ Producing a fully recyclable product
- ✓ Operating our own recycling facility

Our environmental impact & EPD

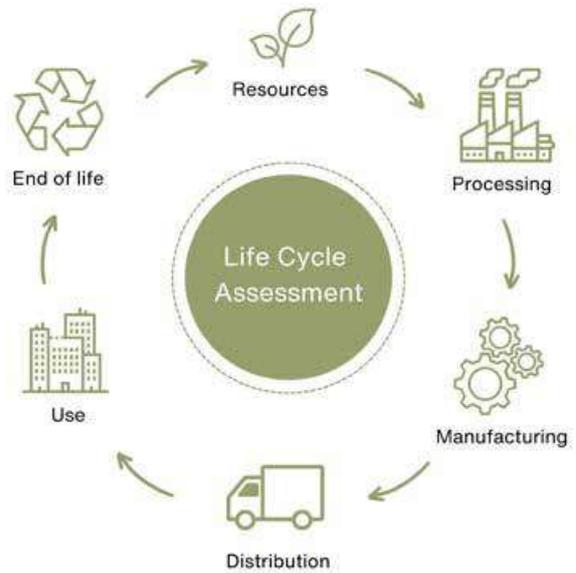

ENVIRONMENTAL PRODUCT DECLARATION (EPD)

An EPD shares information on a product, its raw materials, and its environmental footprint.

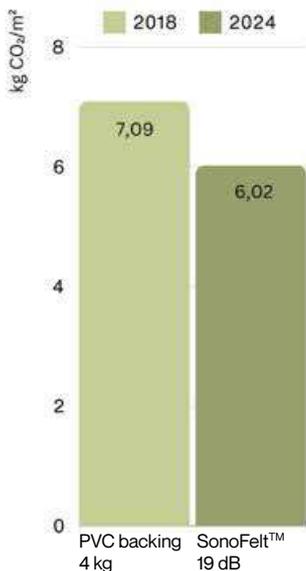

It is a transparent document that takes the full Life Cycle Assessment (LCA) of a product into account. Through our EPD, we can show our efforts and growth in reducing our ecological impact and emissions over the years.

The data allow architects, designers and engineers to compare different products and their environmental impacts. Our EPD and amongst others, our CO₂ emissions have been verified and published by IBU, a certified third party.

30

2TEC2'S IMPROVEMENT IN REDUCING CO₂ EMISSIONS

REDUCING OUR CO₂ EMISSIONS

2TEC2's SonoFelt™ 19 dB has a Global Warming Potential (GWP) of 6.02 kg CO₂/m² (*). Compared with our previous standard product, that's an improvement of 1.07 kg CO₂/m².

However, our journey does not end here. We will continue to reduce the environmental impact of our flooring even more.

*A1-A3 / LCA Calculator GUT

For a complete overview of our sustainability journey, visit www.2tec2.com or download our sustainability brochure.

Compliance & certifications

PROOF OF EXCELLENCE

2TEC2 understands the importance of providing credible and transparent evidence of our commitments and actions. We comply with a series of respected international certificates and labels, to show the world how much we care about product quality, human health and the environment.

Hospitality

Combining the best elements of soft and hard surface flooring, our solutions enhance your hotel's or restaurant's atmosphere and ensure your guests feel right at home.

Main features

- + Design versatility
- + Hygienic & easy to clean
- + Class 33 heavy usage
- + Acoustic sound absorption
- + Slip-resistant
- + Colour fastness
- + Anti-fungi
- + Fire-retardant
- + Healthy indoor air quality
- + Dirt-hiding & stain-resistant

Chosen by Four Seasons Georges V, RIU hotels, JW Marriott, Accor Hotels, Le Sanglier des Ardennes, Wyndham.

Collection & product Palma Charcoal

Healthcare

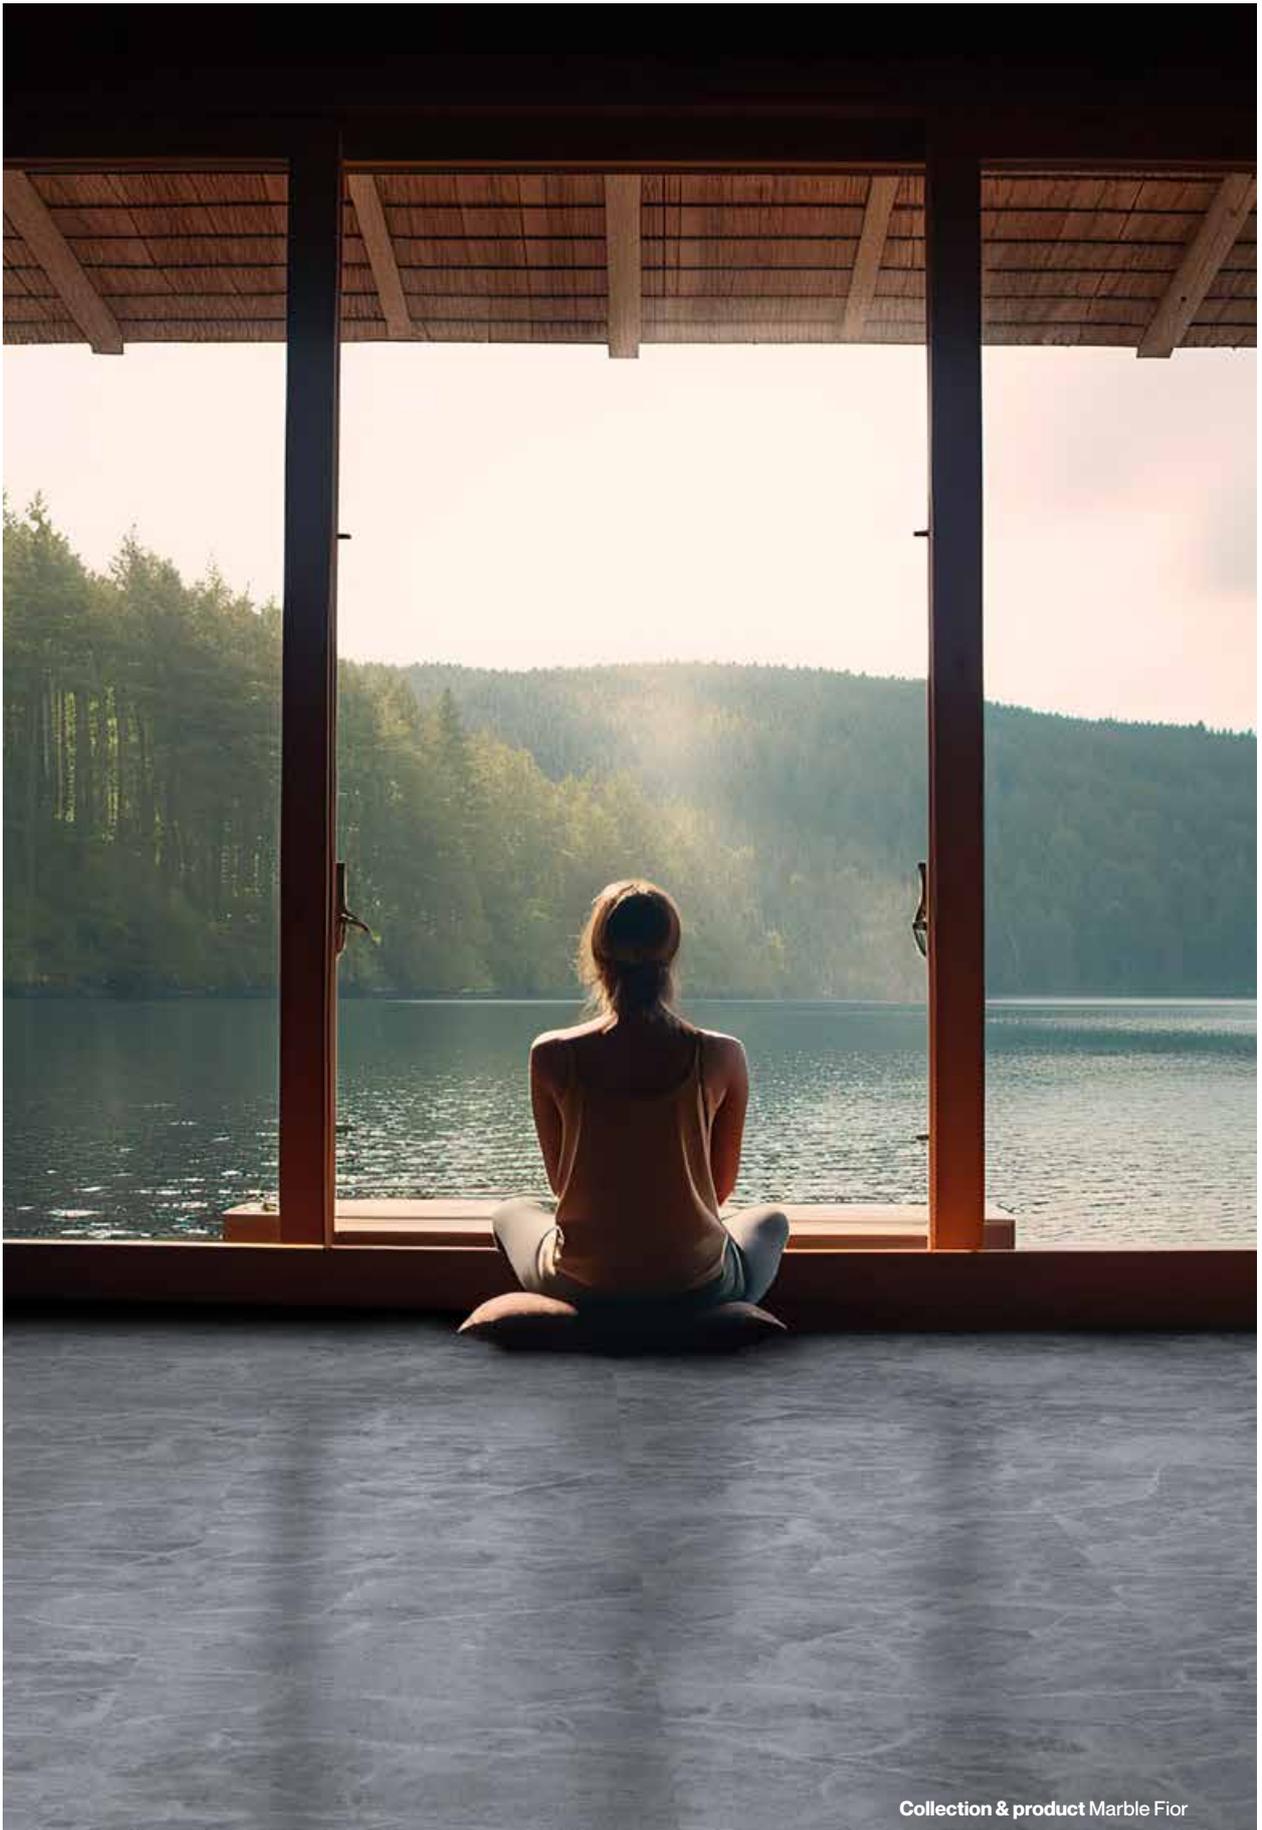

2TEC2's unlimited product collections offer a selection of colours and designs that will provide comfort to your patients and those caring for them. Mostly, our woven flooring is not only beautiful, but also easy to clean, antibacterial, safe and comfortable: qualities that are essential to any healthcare environment.

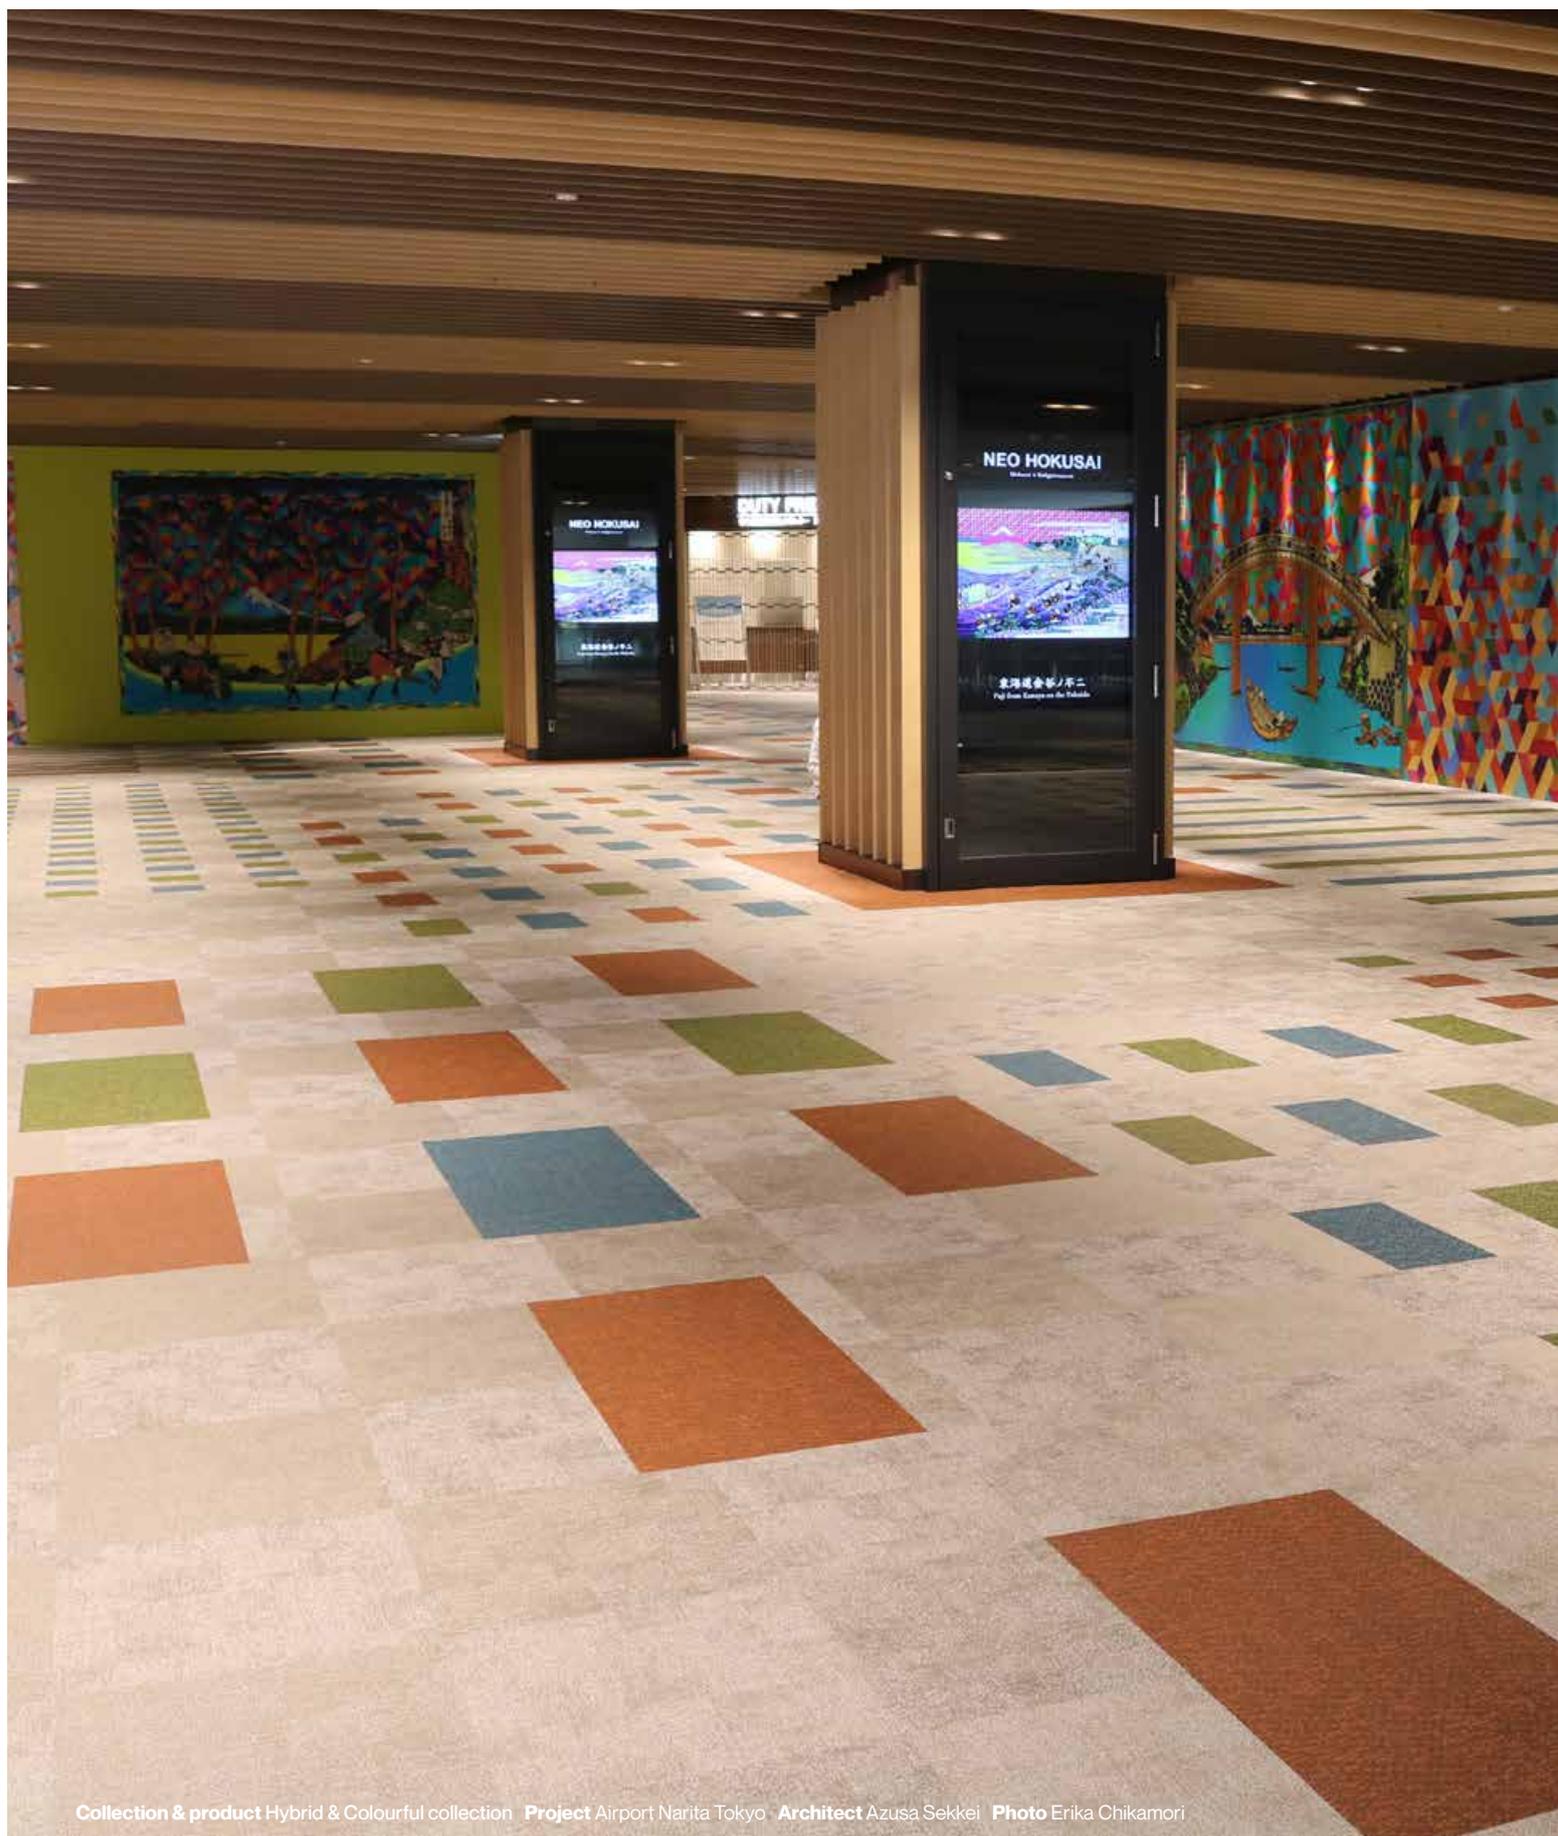

Main features

- + Design versatility
- + Hygienic & easy to clean
- + Class 33 heavy usage
- + Acoustic sound absorption
- + Odourless
- + Well-being of patients and visitors
- + Anti-allergic properties
- + Suitable for disinfection
- + Anti-static properties
- + Slip-resistant

Chosen by Sensabell Clinic, Clinica Pof. Luis Jardim, Odontolia, Antwerp Eye Care, Kapittelhof nursing home

Public spaces

Public spaces need flooring that is comfortable and lasting. The durability and maintainability of our woven vinyl allows your flooring to stand the test of time under heavy commercial use. Design a public forum that fits your needs with our endless combinations of striking colours and designs.

Alhambra

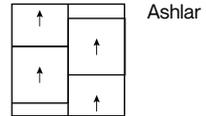

Class 2
Bio-based
SonoFelt™ 19dB

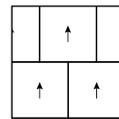

Inspired by the refined expression of beauty and emotion found within the well-known Moorish sun-soaked Alhambra palace, this pattern plays hide and seek with intricate mosaics and vegetal motifs.

The Arabic name 'al-Hamra' means 'the red fortress', celebrating nature's dance of light and sun on warm evenings. The colour palette varies from the azure hues of the Andalusian sky to the earthy warmth of sienna and umber tones in the surrounding hills. Celebrating the art of discovery, the Alhambra motif beckons with its delicate filigree of ornamental motifs and ever-unfolding details, inviting you on a journey of exploration and delight. Each glance reveals new intricacies, weaving together echoes of history and whispers of elegance.

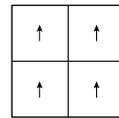

Elevate your space with the Alhambra Collection and let the spirit of Moorish grandeur and exquisite craftsmanship adorn your interiors with grace and refinement.

Bio-Based

Palma

Embrace the serene oasis of palm tree leaves beneath your feet and let their gentle sway evoke a feeling of relaxation and sophistication.

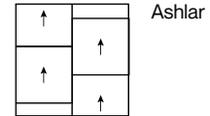

The Palma Collection captures the essence of tropical elegance, bringing a sense of natural allure to any space. The Latin word “palma” holds a rich history and symbolism, originally referring to the palm of the hand as the key to life. Over time, the palm tree became associated with peace, prosperity, and tropical paradise. Its graceful leaves and resilient nature have inspired artists and designers throughout the ages, carrying an exotic whisper of eternal life.

Palma exudes warm elegance, beauty, and tranquility, yet is at the same time vibrant and visually engaging. Create a lively space with this refined masterpiece design, crafted by nature.

Desert
collection

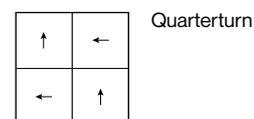

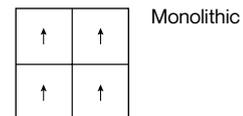

Desert

The Desert collection pays homage to the aweinspiring stretches of arid wasteland that blanket our planet. Though the pattern may appear simple, just like the terrain its named for, each piece is made of a unique and vibrant ecosystem, which creates an impressive, everlasting impression.

Infinite

Our Infinite collection is inspired by the mysteries beyond our planet. Looking upwards, we seek to bring the beauty and awe of the night sky, and the celestial bodies that inhabit it, down beneath your feet. Named after the cosmic figures of our universe, each of the pieces in this collection expresses limitless power.

Hybrid

The Hybrid collection is inspired by the biophilic design philosophy. Biophilia is the inborn need people possess for contact with nature which is essential to their physical and mental health, productivity and well-being. Satisfying this need for contact with nature in the modern built environment is something called biophilic design.

Colourful
collection

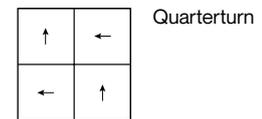

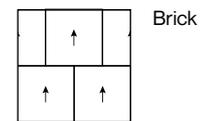

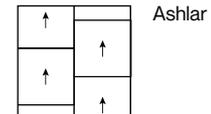

Colourful

Our Colourful collection is a complex combination of hues and tints to breathe life into your flooring. Each of our shades is inspired by powerful forces of nature, vivid expressions of strength, from the radiant constellations that map the heavens to the magnificent undulations of the Aurora Borealis, to the flickering ferocity of fire. With a darker base undertone, each pattern is flecked with lighter shades, creating a complex visual.

Herringbone
& Cracked earth
collection

Herringbone

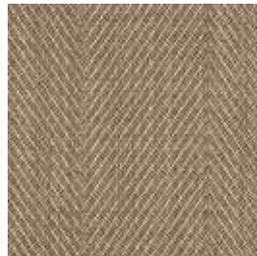

Herringbone is influenced by the sharp, V-shaped patterns found in the delicate fossils of the marine animals after which this pattern is named. Just like the biological structure it is inspired by, the Herringbone pattern acts as the unyielding, skeletal framework for your room, upon which you can build the rest of your interior design. While using the same colour, the alternating columns in this design give the curious appearance of two distinct shades when viewed from afar.

Collection & product Cracked Earth Arid tiles Project Martin's Agora City Resort Architect Altiplan

Cracked Earth

Cracked Earth tells a story of the earth's resilience to the elements as it weathers the onslaught of passing millennia. Inspired by the arid landscapes on our planet subject to the unforgiving power of volcanic activity, this collection reminds occupants of the unique grandeur that comes with age. The cracked lines featured in this collection are striking and powerful, exhibiting the raw strength of time, and the earth's obstinance against it.

Barcode,
Stripes & Lustre
collection

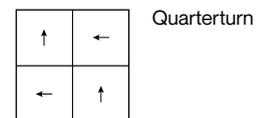

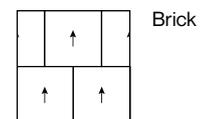

Barcode

The Barcode collection uses shading and geometric techniques to create an illusion of movement along its surface. Harmonizing both dark and light, this pattern evokes serenity, reflecting the first rays of a rising sun. Looking closely, one can see the barcodes are constructed through asymmetrical, linear weaves which, when stepping back, gives off an illustrious perspective.

Stripes

Stripes utilises streaks of spirited colour to inject your space with life and excitement. Bright blue or orange lines against a dark base, the streaks of dye are an eye-catching accent piece to match the colour tones that define your room. A combination of thick and thin lines offers a textured appearance to the floor.

Beautiful textures to create inviting spaces

BEAUTIFUL RUGS TO CREATE ATMOSPHERE

Our woven rugs make for unique centrepieces that can accentuate a neutral space or extend the floor style of another room, without compromising on cleanability and performance. Durable, strong and uniquely beautiful, our woven rugs are the solution to create **extra atmosphere** or **functional zoning** in hospitality, reception areas, office spaces, meeting rooms, showrooms or outdoors.

DIFFERENT SHAPES, MATCHING FINISH

Our rugs come in various shapes and sizes, finished with a border that matches the design and colour of the rug.

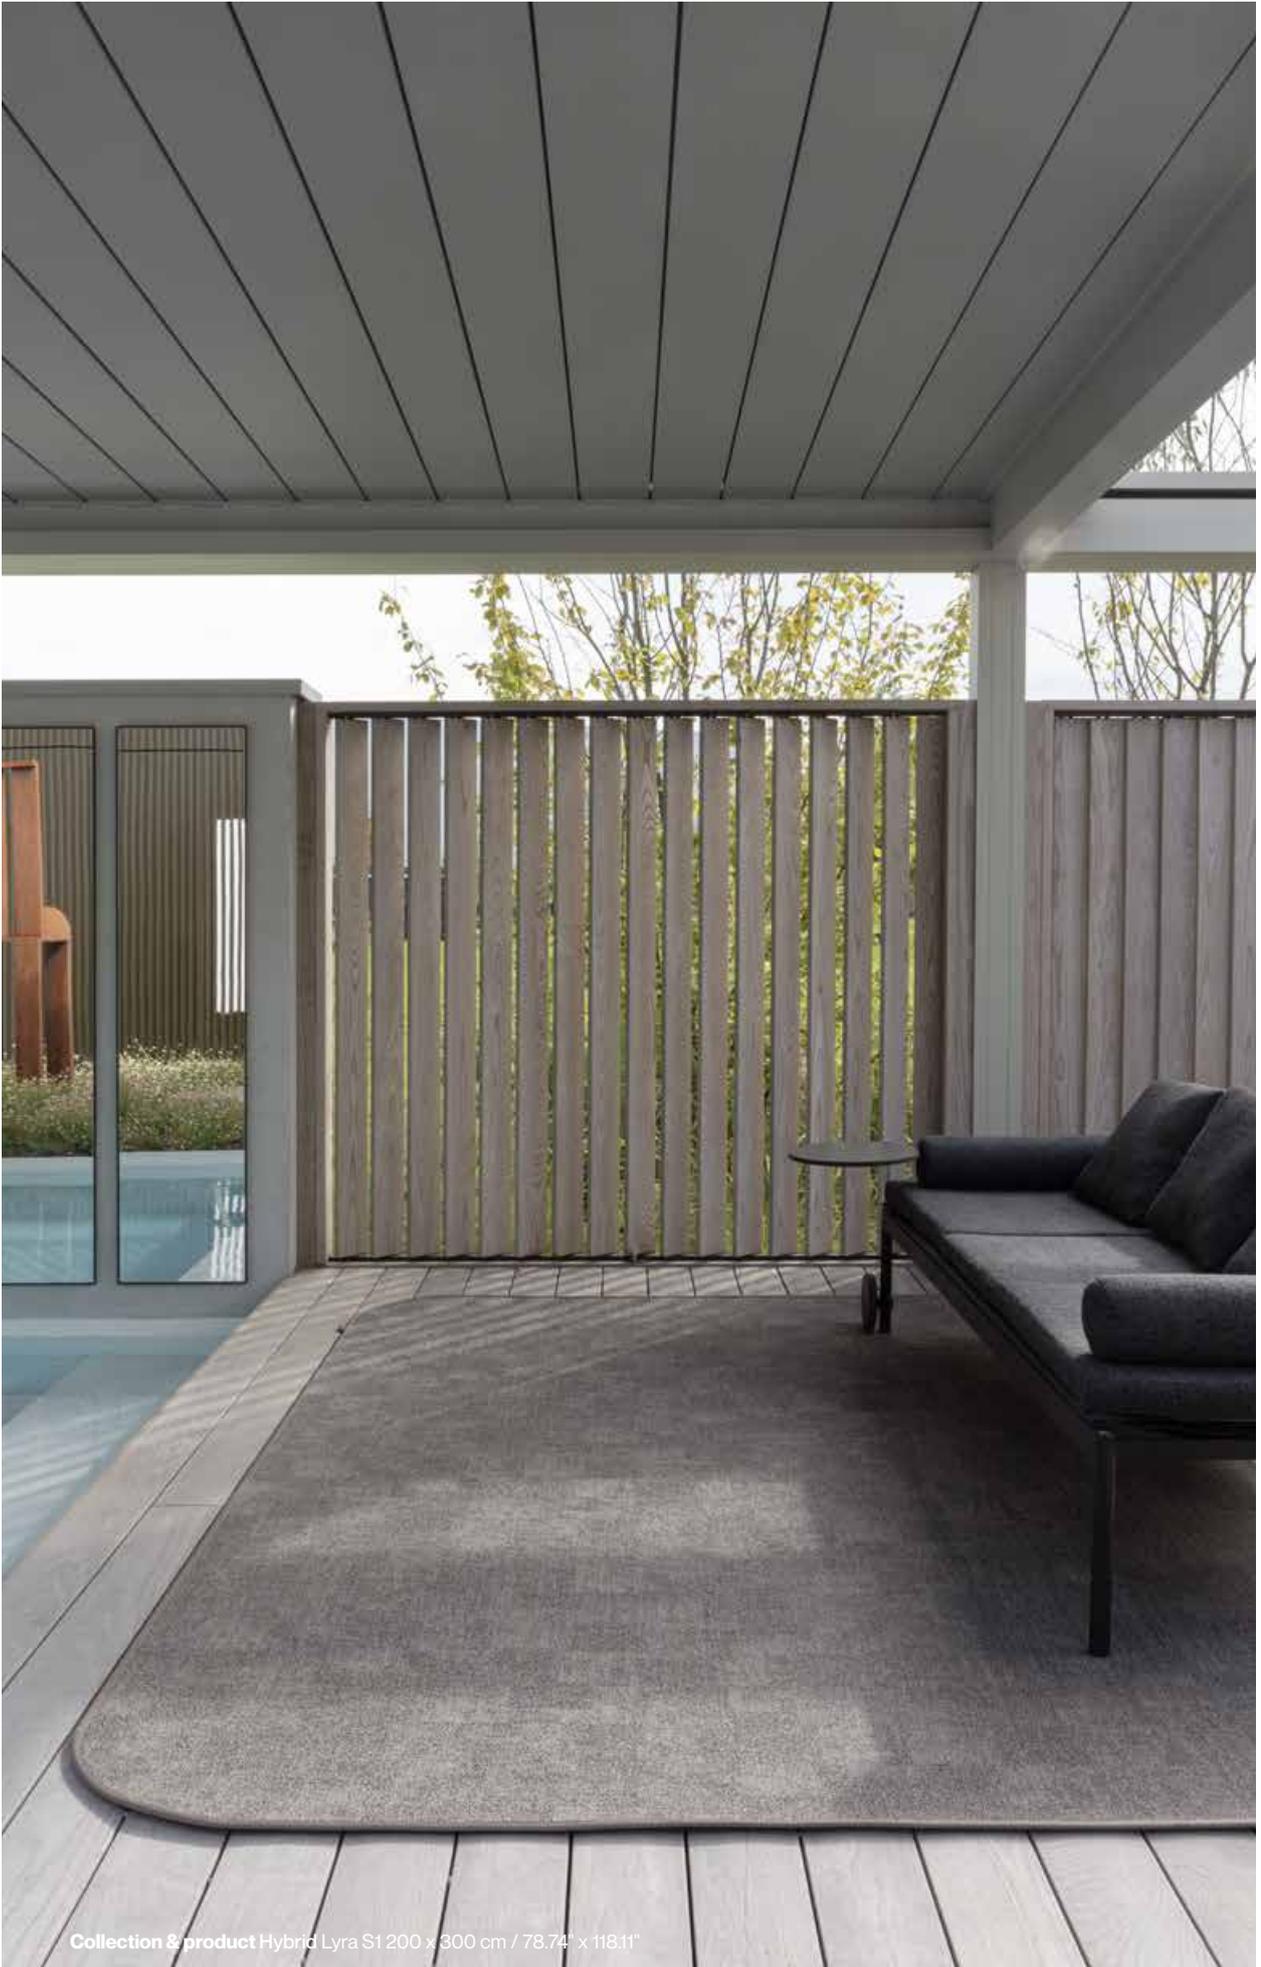

Would you rather have something truly unique? Bespoke options are available, ask our sales team to work out a custom-made floor solution with our rugs.

INDOOR & OUTDOOR

2TEC2 rugs are fit for both indoor and outdoor use.

Installation of a 2TEC2 floor

ADHESIVES

Rolls are to be placed with a permanent adhesive, while tiles are to be placed with a non-permanent one.

USE AND RE-USE

Tiles installed with tackifier are easy to remove and replace if you wish to update your interior or to re-use them in another location.

THE FINISHING TOUCH

We recommend to install your 2TEC2 floors as the final step in your construction or renovation project to protect our beautiful patterns from dust, paint or indents.

READY-TO-USE

You can immediately walk on 2TEC2 and furnish your room after the installation, no need to wait.

A VERSATILE FLOORING SOLUTION

2TEC2 can be installed on different types of evenly levelled subfloors: cement-based floors, stone floors, even LVT or hardboard floors can be assessed fit for 2TEC2 installation. Just make sure the underfloor is clean, dry and completely even levelled, and you will get a perfect result.

A professional installer will ensure that the beautiful texture of 2TEC2 comes to life in your room. Feel free to reach out to our network of installers or make sure to consult our installation instructions. 2TEC2 is always at your disposal to provide additional technical support.

For more detailed guidelines on installation, visit www.2tec2.com and download our installation instructions.

Maintenance of a 2TEC2 floor

EASY MAINTENANCE

Our floors can be easily cleaned with just water, there is no need for hazardous chemical cleaning products. They are also stain-resistant. Since they do not absorb any liquids, stains are easy to remove. You can simply rinse the dirt away.

When 2TEC2 is placed at an entrance, a walk-off mat is recommended. Entrance matting prevents soiling and accelerated wear.

For optimal cleaning, we refer to our general maintenance instructions which you can find on our website www.2tec2.com.

GENERAL CLEANING INSTRUCTIONS

- Vacuum your floor regularly to avoid dirt buildup and to decrease attraction of dust.
- Remove dirt, stains and liquids by simply using water and a cloth without any additives within 24 hours.
- Diluted detergent or bleach may be used for persistent stains.
- Perform a deep cleaning at least once a year to elongate the life of your floor and keep it as beautiful as it was intended.

Injection extraction machine for deep cleaning.
